May 2016

Further expansion in US for Qlucore

As part of Qlucore's commitment to business expansion in the US, Yana Stackpole has been appointed as Sales Manager for North America.

The appointment of Yana Stackpole, based in Boston MA, will help drive new business on the East Coast, and to support Qlucore's expanding client base. Yana is a bench biologist with a PhD in biophysics and has an MSc in business management. Her areas of interest are big data analysis, genomics, biotechnology, discovery and partnerships.

The US is an important and fast-growing market for Qlucore, which has seen a rapid increase in new contracts for its Qlucore Omics Explorer software. In 2014 Qlucore opened an office in New York, strengthening its position in the States, and allowing it to capitalize on the strength of the biotech and pharma industries as well as all universities and government driven research institutes. Qlucore is a member of the Swedish American Chamber of Commerce, the preeminent Swedish-American transatlantic organization dedicated to the promotion, advancement, and protection of direct commercial relations between the United States and Sweden. Qlucore is also a member of the Massachusetts Biotechnology Council, an association of more than 600 biotechnology companies, universities, academic institutions and others dedicated to advancing cutting edge research.

Qlucore Omics Explorer is unique in that it allows the actual researchers – the people with the most biological insight – to study their own data and to look for patterns and structures. As a result, researchers do not need to be statistics or computer experts in order to use Qlucore Omics Explorer effectively.
